Study procedure

This 1. survey is mainly to map and provide information about your demographics, as well as current IT skills and the different devices you own, which will be of use later in the thesis when analysing the data from the lab study.

Later in the (on-prem) lab study **13. December**, you will be asked to sign in to different accounts and to check your account settings on the various. Here you'll be asked to fill in what types of devices that are trusted to your account, which devices you have stored the different passwords etc., so keep this in mind when filling out the devices you own.

Shortly after the (on-prem) lab study you will recieve different scores, explaining your accounts accessibilty and security/safety with some follow-up questions around.

Purpose

The purpose of the studies is to gain an understanding/picture of how various users have configured their user accounts, to analyse their accounts security and accessibiliy on the different plattforms chosen for this thesis.

Privacy statement

There are no questions asking for any sensitive information such as passwords, phone numbers or email addresses. We only ask about your IT skills and what authentication and recovery methods are enabled in your user account. Demographics from participants may be used to derive statistics about user behaviour. Beyond that, no further linking of the collected information to individuals can be made.

The data will only be available for me and my supervisor (Nils Gruschka), and will deleted after the thesis is delivered, (hopefully) within less then a year.

I accept that the information about my IT-skills, demographics, and my account setup information will be collected, analyzed and saved for a year as data for the purpose of the thesis

5	3	12%	<div><div></div></div> 12%

Devices (1)

For the remaining questions you need to create a list of your devices. This list will be printed out and handed to you in the following lab study. It might me useful to use simple nicknames so you know which device you are referring to.
We expect a user to have max. 3 phones, 3 computers, 2 tablets, 2 smart watches and 2 security keys. Below you find an example for a list, which might be used as a template.

The list should look something like this:

Phones:

- Phone 1: iPhone (Private)
- Phone 2: iPhone (Work)
- Phone 3: -

Computers / Laptops:

- Computer 1: Computer (home)
- Computer 2: Laptop (office)
- Computer 3: -

Tablets:

- Tablet 1: iPad
- Tablet 2: -

Smart Watches:

- Smart Watch 1: Smart Watch
- Smart Watch 2: -

Security Keys:

- Security Key 1: YubiKey
- Security Key 2: -

Devices (2)

Please indicate what devices you have added to your list by selecting the respective devices.

Conclusion

If you have any comments, we'd appreciate your feedback in the text field below. Also, if you discovered any errors in this survey or had any problems, please let us know.

Finally, don't forget to click on Send when you are done.

Feedback

Antall svar: 6

- No problems :)

- :)

- Jeg vil ha kake

- I hope this thesis lives up to the expectations, based on the information I have received prior to this study. Good luck, may our paths cross once again.
- Love u, xoxo :)

- you are funny:p

- Very nice
